

Recent works that have been carried out at the bereavement suite at L&D

The room did not have a soundproof door which resulted in the bereaved families using the room being able to hear all the sounds from the corridor and adjacent rooms.

We built a small kitchenette area to enable families to have access to tea and coffee making facilities without having to leave the room. We also partitioned off the storage area where baby equipment was visible.

Thank you from all at Bedfordshire Sands for the donations which made this possible.
